A. Appendix section

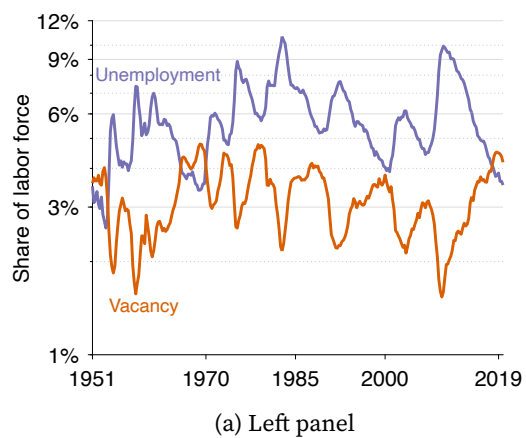

We check that citations work: Michaillat and Saez (2015) and one include one more: Michaillat (2014).

We can also cross-reference using the ‘xr’ package: our equation in the main document is (1) as long as we keep the relevant ‘paper.aux’ file in the same folder. The following command in the preamble : ‘\externaldocument{paper}’ where ‘paper’ must be the title of the main document.
